## PROJECT REQUIREMENT

### Task at Hand

Value and Budget Housing Corporation Pvt. Ltd. (VBHC) is a professionally managed real estate company. VBHC's objective is to provide housing that meets high quality construction standards, and ensures speedy completion and delivery at low cost. These objectives are best met through the application of contemporary building technology, computer aided design methods, a lean manufacturing process and the adoption of ingenious industrial engineering processes. VBHC has been able to transform real estate development into a lean industrial process with the use of 'form' technology for construction. This project has 5 blocks, each block has an open area for parking at ground level and 4 floors of apartments and the client was looking for high performance single component chemical waterproofing product for their tower terrace RC slab.

### Area Covered

1500 m<sup>2</sup> of terrace slab

## DCP SOLUTION

We had proposed our **Aquathane PP500** through the product presentation to their VP and in turn it was submitted to their in house structural team for vetting and approved for use in the project.

### Products and Quantities Supplied

<b>Aquathane PP500</b>	2,800 ltr
------------------------	-----------

### Supply Period

September and December 2014.
